To Whom It May Concern:

Re: Saldan Developments

Please be advised that Raiffeisen Co-op was built by Saldan Developments in 1994. I was involved with the construction of the Co-op and continue to live at Raiffeisen. From my on-going experience, I can tell you that Saldan built a quality product. Move-in deficiencies were minor and over the years, Raiffeisen has had little maintenance above regular wear and tear.

I am currently working with Saldan Developments for the construction of an 80 unit affordable housing project. Sam Biasucci has once again made this a very enjoyable task. He has given our Board a lot of input for the construction and has taken the time to ask and meet our specific needs. His co-operation during the process and dedication to housing are commendable and appreciated. I highly recommend that Saldan Developments be considered for any developments. In my opinion, Sam will deliver a quality product that you can be proud of.

Sincerely,

Barbara Millsap
President, Board of Directors
